## **Advantaged Thinking**

VPG uses the concept of Advantaged Thinking to direct the way we work with young people. VPG acknowledges that young people have a vital contribution to make to the social and economic life of our communities and society, and that to do so all young people should have access to the opportunities and social networks that facilitate this social and economic participation. VPG invests in building young people's abilities, harnessing them for personal as well as social good.

By making a positive investment in young people, the approach focuses on developing their assets, and on co-creating solutions – real jobs, real education and real community connections – to enable them to achieve independent adulthood.
